

DOUBLE DEEP

Selective Rack is the most commonly used rack. It allows for the maximum number of SKU facings and is cost effective. Selective Rack allows for the most flexibility in slotting design.

Selective Rack is the most commonly used rack. It is low cost, flexible and readily available. Advance can provide either roll form or heavy duty structural product.

Advantages:

- Low cost
- Full selectivity
- Ease of adjustability

Limitations:

- Lack of density
- Poor use of facility cube
