

## VERY NARROW AISLE

Very Narrow Aisle systems typically have 72" wide aisles and are accessed by wire guided turret trucks. Many of the systems have automated position locators that allow for very rapid access to loads.

### Typical Applications:

- General storage warehouses

### Advantages:

- Low initial rack cost
- High productivity in full pallet retrieval

### Limitations:

- Fork trucks cannot pass in aisles
- Difficult to pick and restock at the same time
- Higher fork lift cost
- Requires rehandling to dock and shipping trucks
